Revitalizing web experiences with my expertise, I specialize in crafting seamless **React** interfaces. Ensuring robust data management through **MongoDB**, I bring versatility with **Python Django** from college projects. Rooted in **Node.js**, with proficiency in **Express**, I offer quick learning and adept project management. Ready to contribute a dynamic blend of technical prowess and creative finesse to elevate your team!

## EXPERTISE

### Languages

- Javascript
- Python
- HTML
- CSS

### Frameworks and Libraries

- React
- Bootstrap
- Tailwind UI

### DevTools

- Git
- GitHub
- VsCode

### Databases

- Firebase

## EDUCATION

2019

**Higher Secondary**

Don Bosco HSS

2023

**Btech major in Computer Science**

College of Engineering Kidangoor (KTU)

## CERTIFICATION

Node.js

Hacker Rank

Issued November 14<sup>th</sup> 2023

Javascript

Hacker Rank

Issued November 13<sup>th</sup> 2023

Python

NIT

Issued October 22<sup>nd</sup> 2022

Access all my certificates: [bit.ly/ben\\_certificates](https://bit.ly/ben_certificates)

## PROJECT

**Stock market prediction using AI**, my college main project, utilizing **RNN** and **LSTM** models for stock prediction and with **Python Django** as Backend with **postgreSQL** as database

**EZYPARK**, my college mini project, streamlines parking management with its Automated Parking System

**Personal Portfolio**, A portfolio website with **HTML**, **CSS** and **Javascript** and hosted at [korulla.github.io/Portfolio/](https://korulla.github.io/Portfolio/)

**Wholesale delivery app** with real-time item management by admin and user interaction using **Firebase** integration. and hosted <https://korulla.github.io/WholesaleDeliveryApp/>

**Netflix-Clone** Made with **React** and also using **Material-UI**, **Axios**. Integrated with **Firebase** for secure user login and backend also powered by **TMDB API** for dynamic content and hosted at <https://netflix-react-1a5fb.web.app/>

**Micro Projects**, Joke generator, todo-app, realtime cart-app
